

Materials List

Below is my materials list. In most cases what you have will most likely be fine. I'm providing pictures of what I like to use. You may improvise or substitute tools you like. You might be able to find the same tools at a supplier close to you or make your own. I have put an asterisk ** next to any tools (or some version of) that I feel are imperative to the workshop.

Item	Description	Image
½ - 1 bag of Clay **	I will be using a smooth cone 5 porcelain. Although any semi-smooth to smooth clay will work. You may work with any low fire to high fire clay. It may be porcelain or iron rich. We will be learning to build forms and creating textured surfaces. I often just use a liner glaze with my porcelain, but You will be able to glaze the forms later with any glaze you would like to experiment with.	
1**	Rolling pin, slab roller or some way to make slabs.	
1 or more	Shallow plaster hump mold, bisque mold, and/or drape mold. I will be showing how to utilize each style of mold during the workshop. If a student doesn't have access to molds the students may email me about options so they may still participate in the workshop. Image: Back row: Thrown/ Bisqued hump mold Front Row: Drape mold made from double sided Masonite or Hardboard	

Variety of	Texture tools: store bought, homemade, and/ or found. Texture rollers, matts, peach pits, acorns, seashells, screws, bolts, rubber bands anything you have is fine. I would not spend a ton of money special items. I will be showing how to make some texture tools and how to utilize found objects for texture.	
1	Basic Wire tool	
1	Basic Needle tool	
1 - 2 **	Scoring tool – you may have different styles. Here are a couple of options I like. Also, homemade scoring tools with small tines are fine too. Since we will be making fine connections a fork will be to large.	
1 **	Shredder Mudtool or you can also order just the refill blade for a Surform. It hard to find the refill. Often you have to order it online from home depot.	

1 **	Small Flat brush - about a Size 6 – inexpensive as we may cut it up. I like to sculpt with 1 brush that is about a size 6 I cut the bristles to a length I like. You might find you like a different size.	
1 **	Wooden modeling tool -Kemper 8" long WT12	
1	Kemper WT6	
1	Set Loop Carving Tools	
1	Kemper wipe out tool or another brand of rubber tip tool	

1	Kemper clean-up tool. Or a similar tool from another company.	
1**	Fettling knife or other clay cutting knife with a relatively shape blade.	
1- more **	Rib for compressing clay: Rubber or Metal	
1 **	Ruler or straight edge	
**	Water or slip for connections	
	Pencil
