

Pocosin Arts School of Fine Craft

Materials and Equipment

Instructor Name: Jennifer Wells

Please consider carefully all the tools and materials you will need to successfully complete your workshop. Provide as much detail as possible (see example.) Please email Eli Arenas at zoom@pocosinarts.org with any questions.

Providing the supplier name and exact item number assure that we purchase exactly what you need.

Specify Quantity per Student/ Studio	Item/Tool/ Material	Supplier/ Website/ & Item Number	Select One of the Following:	
			Instructor will send	Student will order
1 dozen per student	4/0 saw blades	Rio Grande – www.riogrande.com Item # Item: 110032		X
1	Half round file #4 cut This is a general need. I suggest half-round because you will then have two working faces. If you already have a selection of files, those will work fine.	# 114930		X
1	Snips/ cutters – I love my flush cutters as they leave me with a better end on the wire as I'm working and that requires less clean-up. If you have regular cutters, they will work fine, you'll just need to do more clean-up	# 111033		X

2	Pliers- chain nose These are the pliers you'll use to close all your jump rings. Having two pairs will make it easier	111078 or 111900		X
1	Flat and Round nose Forming pliers	111190 or the tronex brand (these are the ones I have and love them) Allcraft carries the Tronex mark. They are more expensive but a great tool.		X
1	Parallel nose pliers There are several brands with various price points. If you're looking to get a pair of these my main concern is that the jaws be smooth, without teeth.	# 111117 Optional		X
1- 6"section	Wooden dowel rod 1/2" - 3/4" diameter	Local craft store. You could also use an alternative material. All you need is a round rod that is 1/2" - 3/4" in diameter		X
1 - 4" section	Round steel / brass rod 1/4" diameter-	You should also be able to find a steel or brass rod at a local hardware store. They will most likely sell it in 3-4 ft. lengths, ask if they have any cut offs as you only need a 4" length.		X
1 each	Drill Bit- # 59 (1mm), 54 (1.5mm)	59- # 349418 54 - #349413		X

1	Saw frame	110042		X
1	Bench pin & Anvil- I prefer this combo as it allow me to hammer right on my bench pin. You can also have your bench pin and a separate steel block.	110014		X
1	Drill Press or flex shaft – for drilling holes, you could also get a small hand drill or a hole punch. (the hole punch will not require you to have drill bits)	Hand drill - # 117012 Hole Punch- # 116258		X
1	Hammer- this can be a small hardware store hammer (I love my baby pall pen hammer), a plannishing hammer, or other. We'll use this to add a slight texture to the surface of the metal.			X
1	scribe	118459		X
1	Rubber cement			X
1	Sharpie Marker			X
1	Masking tape 1"			X
1	6" metal ruler- I recommend metal as it will hold up to using the scribe against the edge.			X

3"	4 mm heavy wall tubing- this is for a type of clasp. I will demonstrate how to make a clasp using this tubing. You can decide if you want to make the clasp or not.	100426 (optional)		X
5 ft	20 gauge round wire sterling silver This will be for making chains. If you want you can also work with copper wire to learn the techniques.			X
2 ft	18 gauge round wire sterling silver For connections			X
1 ft	16 gauge round wire sterling silver For clasps			X
1 sheet 6" x 6"	24 gauge brass sheet If you are ordering from Rio- they only sell it in a 6" x 12" sheet	Rio Grande #130124 Or Metalliferous # BR6045 http://www.metalliferous.com/24-ga-0020-Brass-Sheet-6-x-6/productinfo/BR6045/		X
