

Enamel Design, Color Gradations, and Opalescent White

Class Outline

1. Learn Your Colors
 - Color Samples
 - Color Sample Combinations
 - Translating Color Pencils into Enamel Color Studies
2. Enamel Layer Applications
 - Single Layers
 - Blends
 - Edges
 - Double Layers
 - Changing Colors
 - Offsetting Colors
3. Value Gradations
 - Light to Dark
4. Multi-Color Gradations
 - The Color Wheel and Your Enamel Colors

Outcomes

1. Students understand the Principles of Color Combinations
2. Students learn different enamel application techniques to create Color Gradations
3. Students learn to control the Value (how dark or light) of their transparent enamel colors
4. Students become comfortable using color gradations to create interest, excitement, and focus in their enamel pieces
5. Students understand and apply the science/techniques of using opalescent white enamel to blend colors and create depth/mystery within their enamel layers
