Pocosin Arts School of Fine Craft

Materials and Equipment

Instructor Name: Carly Slade**- Slab building**

Quantity	Item / Tool / Material List	Supplier	Notes
1	Inner Eye Slab Bevel Tool	https://dirtygirlspotterytools.com	This is the Cadillac of bevel tools; you can also start with a cheaper plastic version to see if you like it
1	Framer's Square	Hardware store	12". It should be totally flat, do NOT get a Speed Square which has the lip.
1	Zona 37-434 L-Square, Stainless Steel, 3-Inch x 4-Inch	Online	
1	Metal rulers (12inch and an optional smaller one)		Do NOT use plastic, your knife will cut the plastic and it won't be straight
1	Kemper F96 Soft Fettling Knife	https://goodearthclays.com/products/kemper-f96-soft-fettling-knife?_pos=4&_sid=63908431d&_ss=r	
1	X-Acto #1 Precision Knife	Online or your local store	Its the small individual blade one (not the big ones with the long blade that snaps off).
1	Kemper MRS Mini Ribbon Set	https://goodearthclays.com/products/kemper-mrs-mini-ribbon-set?_pos=1&_sid=91f20ec38&_ss=r	Don't get the knock off versions, the corner are not as sharp as with the Kempers.
1	White Vinegar	Just a small bottle from your grocery store	Get a little container to mix your slip in as well. Just a yogurt container from your recycle will

			work.
10lbs	Brown clay: terra cotta is a good low fire option and will be available everywhere.	Your local supplier	
1 oz +	White slip or underglaze	For my “icing” I will be using porcelain casting slip that I already have mixed up for my Mail Mugs. I will talk about this in the workshop but finding the right white clay for your brown clay will be hard. If they don’t have similar shrinkage rates there will be cracking. You could also use some of your brown clay made into slip and paint it after. You could use underglaze but it would be very expensive if you use AMOCA Velvets so I would suggest buying a cheaper container of your icing colours and leave the lids off for a few days so they thicken.	
1	Kemper WT18 8 Wood Modeling Tool	https://goodearthclays.com/products/kemper-wt18-8-wood-modeling-tool?_pos=10&_sid=138cf3177&_ss=r	It doesn’t need to be this exact one but it needs the wide curved end like this one. I have a bunch of different wooden modeling tools I use, You could get a set of them and see what you like using.
1	Blue Mudsponge by Mudtools	https://goodearthclays.com/products/mudsponge?_pos=1&_sid=a17ba581f&_ss=r&variant=49263296676137	
2-10	Cheap painting brushes	Online or local art store	Get different sizes and shapes to try them out. I like the brand Royal Brush (can get at Micheals) mostly because the handle is plastic. I find wooden ones break down if you leave them in water overnight.
